

EDUCATION				
Degree	Specialization	Institute	Year	CPI/%
B.Tech-M.Tech.	Computer Science and Engineering	IIT Gandhinagar	2024-Present	7.82
Class XII	Physics, Chemistry, Maths	Indutai Memorial School	2022-2024	87
Class X		Fr.Agnel School	2016-2022	97.2

- PROJECTS
- Distributed Attendance Management System

(CS-432 Databases, IIT Gandhinagar) | Github

Developed a full-stack attendance management platform with secure authentication, role-based access control, and REST APIs using React, Vite, Tailwind CSS, Node.js, Express.js, and MySQL.

Implemented advanced database system concepts including custom B+ Tree indexing (Python), ACID-compliant transaction management, Write-Ahead Logging (WAL), crash recovery, and horizontal database sharding with Student-ID based hash partitioning.

Evaluated system scalability through Locust stress testing upto 1000 concurrent users, and benchmarked indexing, distributed query routing, and transaction processing under concurrent workloads.

[Jan '26 - Apr '26]

SmartSpend AI – AI Powered Personal Finance Assistant

Interface link | Github

Developed a Progressive Web Application (PWA) for personal finance management featuring secure authentication, transactions and goal tracking, and interactive dashboards using React, Vite, Tailwind CSS, Node.js, Express.js, and Supabase.

Integrated an AI-powered financial assistant capable of answering natural language queries, summarizing spending patterns, managing transactions through function calling, and supporting voice-based interactions.

Engineered a modular backend with REST APIs, Supabase Authentication, AI tool orchestration, and real-time analytics, enabling intelligent financial insights and seamless user experience across devices.

Implemented Progressive Web App features including installability, responsive design, offline transaction management, and synchronization to improve accessibility across desktop and mobile platforms.

[May '26 - Jun '26]

Image Classification using MLP and CNN

(ES-335 Machine Learning, IIT Gandhinagar) | Github

Designed and implemented Multi-Layer Perceptron (MLP) and Convolutional Neural Network (CNN) architectures using PyTorch for multi-class image classification on the CIFAR-10 dataset.

Conducted comparative experiments to evaluate the effect of network architecture on classification accuracy, convergence behaviour, and computational efficiency, supported by visualization of training and validation metrics.

Developed a complete deep learning pipeline including data preprocessing, augmentation, model training, hyperparameter tuning, evaluation, and performance analysis using PyTorch, NumPy, Matplotlib, and Scikit-learn.

[Mar '26 - Apr '26]

Personal Portfolio Website

Website | Github

Designed and developed a responsive personal portfolio website using React, Vite, Tailwind CSS, and Framer Motion to showcase technical projects, skills, achievements, and professional experience.

Created a modern user interface with custom animations, responsive layouts, reusable components, and smooth navigation, emphasizing performance, accessibility, and user experience.

Integrated project showcases with GitHub repositories, live demonstrations, resume download, and contact functionality, providing a centralized platform for recruiters and collaborators.

[May '25]

Data Evaluation Pipeline

(Prof. Mayank Singh, IIT Gandhinagar) | Github

Developed components of an automated pipeline for evaluating, preprocessing, and categorizing datasets prior to machine learning model training as part of a semester-long research-oriented project.

Explored automated feature analysis and dataset categorization workflows to improve data quality and streamline downstream machine learning tasks.

Presented the project through a technical poster, documenting the proposed pipeline architecture, implementation methodology, and experimental observations.

[Jan '26 - Apr '26]

TECHNICAL SKILLS

Programming Languages:

Libraries/Frameworks:

Tools:

C++, python, C, JavaScript, HTML, CSS, SQL

Vite, React, Node.js, Express.js, Tailwind CSS, PyTorch, NumPy, Pandas, Matplotlib, Scikit-learn

MySQL, PostgreSQL, MongoDB, Supabase, Git, GitHub, Docker, Postman, VS Code, Figma, Adobe Illustrator, Canva, Adobe Premiere Pro

ACHIEVEMENTS

- Awarded the Best Summer Project Award 2025 by the Proddicts Club, IR&P Council, IIT Gandhinagar for the VoltGo portable EV charger project.
- Solved 250+ DSA problems on LeetCode.

POSITIONS OF RESPONSIBILITY

- **Senior Design Team Member, TEDxIITGandhinagar** [Aug '25 - Apr '26]
 - Designed digital creatives, promotional assets, and branding material for TEDx IIT Gandhinagar using Adobe Illustrator and Canva, ensuring visual consistency across online and offline media.
 - Collaborated with cross-functional teams to deliver event publicity, social media campaigns, and stage branding within project deadlines.
- **Junior Events Team Member, Amalthea, IIT Gandhinagar** [Aug '24 - Dec '24]
 - Coordinated logistics and on-ground execution for technical events, ensuring smooth participant experience and effective communication among organizing teams.
 - Assisted in event planning, volunteer coordination, and operational management during IIT Gandhinagar’s annual technical summit.
